361 369 [363] inhabitants. It had an official center and wide streets, which, however, are not yet paved. Despite this city appearance, however, Pikine is more intimately dependent on Dakar than the other villages of the suburbs; it is a workman's suburb, and all of its provisioning comes from Dakar, while practically all of its inhabitants are employed in the great city. With this exception, the villages of the suburbs have as their essential [438] role the provisioning of Dakar with fish and fresh vegetables. Many transportation facilities in common connect them with [489] Dakar-ville from very early in the morning until around the middle of the night (Pl. XXIII B, Pl. XXIV A and B).

This is the arrangement or juxtaposition of the various elements of the Dakar agglomeration, whose present popula- [162] tion may well have exceeded 300,000 inhabitants.

369 4. Perspectives. The Dakar agglomeration has the appearance of an unfinished city in the process of being organized, even though its function as a West African metropolis has been confirmed for a long time. There are surprises in this situation for those who analyze the old European urban civilizations, where one sees an ancient city existing as /391/ /Fig. 6 appears here/ one that patiently developed its relations in order to become a metropolis and to constitute a solid and dynamic assemblage where urban and metropolitan functions mutually support one another. Dakar, however, is above 369 439 433 all a center of relations which has woven with its hinterland connections that have the appearance of complementary ties, but which actually are ties of dependence: dependence in fact because in the Senegalese and Sudanese interior the development of export crops is tied up with the means of evacuation organized by Dakar; dependence also because the export crops, in breaking up the former village autarchy, have given Dakar the role of a great relay-station in the importation of food products in compensation and manufactured products which have become a necessity there where formerly they were unknown; dependence, finally, not only for the Senegalese and

874 In 1927 apprentice courses in woodwork and metalwork were started in St. Louis and Kaolack by the Public Works Department for selected schoolboys between the ages of 13 and 16 years.

871 There is a number of educational institutions in Dakar of a higher grade than primary. These are the responsibility of the Federal Government and have been described in Volume I.

Health

743 Senegal is divided into thirteen medical districts, each of which is intended to be under the supervision of a European medical officer. There are 17 medical stations, each under a native auxiliary. There are also 16 maternity centres and 117 posts visited once a week by a medical officer.

In 1937 Senegal and Dakar had 3 major hospitals and 34 minor hospitals and dispensaries. These provided 394 beds for European patients and 1,805 for native. There were 80 European medical officers, 31 native auxiliaries, 30 midwives, 124 male nurses, and 21 female nurses.

[744] In addition there were four travelling parties (*groupes sanitaires mobiles*). One of these specialized in fighting sleeping-sickness in the Casamance Territory, and the other three were concerned with more general sanitary and prophylactic measures.

The Pasteur Institute at Dakar, a federal concern, is justly famous.

[747] Some medical work is done by missionaries. Unofficial committees of the Croix-Rouge are concerned with infant welfare at Dakar, Diourbel, St. Louis, and Tivaouane.

[652] In 1937 Senegal voted 12,000,000 francs for medical services and Dakar 11,000,000 francs.

361 Dakar (Fig. 54) is approximately 2,600 miles distant from Southampton, from Cape Town, and from Rio de Janeiro. It is, therefore, well placed for taking a share in the trade of the South Atlantic, and it [433] is small wonder that it has become the third port in the French Empire, being surpassed only by Marseilles and Le Havre. It is, moreover, of the first importance strategically.
